

Ez-TAP™ Simplifies Diagnostics & Vehicle Data Transmission Wirelessly

Ez-TAP by XscapeEz is a Wireless Data Link Adapter authorized and approved for use with Mack® and Volvo® Premium Tech Tool™ (PTT / VCADS / GUIDED DIAGNOSTICS). These wireless tools are RP1210A/B compliant, competitively priced and easy to install. More importantly, they simplify diagnostics and maintenance by eliminating the need to carry a laptop or roll a computer to individual trucks or wait for a service bay to open to perform service functions.

Simply attach **Ez-TAP** to the vehicle's diagnostic connector, **Ez-Base** to a computer, install application software and in five minutes or less run the diagnostic or maintenance program of your choice wirelessly and without interference to the shop's 802.11 network. This low cost, easy-to-use wireless data link adapter is perfect for triage and quick access to commonly performed parameter programming operations. Using Ez-TAP, maintenance personnel can see vehicle status, clear faults and perform diagnostic functions in proximity to the shop without pulling the truck into a service bay.

Ez-TAP features:

- *Installs quickly and easily. No tools required. Simply plug it in, point, click and begin.*
- *Run OEM diagnostic software, wirelessly and without interference to the 802.11 shop network.*
- *Diagnose vehicle faults anywhere on the lot. Service bay not required.*
- *Both a J1708/1587 and a J1939 vehicle network access device.*

Ez-Base connects a laptop or desktop to Ez-TAP devices via wireless short- range communications, eliminating cables and providing technicians with the ability to perform job

functions from any centralized or distributed location within your facility. Ez-Base is most effective within a range of approximately 300 feet. To increase range, EZ Xtenders are available. Information on XscapeEz products is listed on the Online Ordering System – Diagnostic Tools website at www.premiumtechtool.com (General Information – XscapeEz Wireless Adapter Interface Device link). You can access the Online Ordering System – Diagnostic Tools from the Mack Trucks, Inc. website www.macktrucks.com (Parts & Service/Service/Diagnostics/), and for dealers on the Trucks Dealer Portal at www.trucksdealerportal.com

(Service/Mack/Premium Tech Tool & Software icon, and then Premium Tech Tool Software for a customer/General Information).
