# MACK TRUCKS LAUNCHES REFRESHED MACK<sup>®</sup> MD SERIES

Mack Trucks recently announced a significant refresh of its Mack<sup>®</sup> MD Series diesel and electric medium-duty trucks, featuring a larger cab that improves the driver environment and incorporates new safety features. These updates further strengthen Mack's medium-duty offering to meet evolving customer needs and applications.

“The launch of the refreshed Mack MD Series once again demonstrates Mack's commitment to delivering the best medium-duty truck for our customers,” said Jonathan Randall, president of Mack Trucks North America. “Since the MD Series was introduced in 2020, Mack has continued to listen to our customers and make ongoing improvements to meet their operational needs.

The Mack MD Series is available with diesel or electric drivetrain options in the MD6, a Class 6 model with a Gross Vehicle Weight Rating (GVWR) of 25,995 pounds, and the MD7, a Class 7 model with a GVWR of 33,000 pounds. Both models are exempt from the 12% Federal Excise Tax (FET).

These key updates – now standard on the MD without raising its price – include enhanced driver comfort and safety features, while improving ease of installation for body builders. The biggest change is that the MD's cab is now four inches longer than the previous version,

which gives drivers more seat recline and leg room. This refreshed cab further shows how the Mack Anthem<sup>®</sup> cab influenced the MD cab design and many of the shared driver-comfort features, such as an overhead console for additional storage. The interior boasts premium satin aluminum trim, improved seating with lumbar support and enhanced LED lighting. New steering wheel controls for cruise control, telephone and audio functions have been added, increasing driver convenience and safety. All of these have been popular with Mack's Class 8 customers.

The trucks now come standard with several enhanced safety features including new ABS (Anti-Lock Braking System) with ATC (Automatic Traction Control), radio mute in reverse and a park brake alarm.

Pre-wired body builder connections relocated air dryer and updated wheelbases to industry-standard Cab to Axle (CA) dimensions make the updated MD Series easier to install an even wider array of body installations than previously.

“The MD Series continues to build on the success of our initial medium-duty offering,” Randall said. “Built with Mack's heritage of reliability, these enhancements will provide a more versatile and efficient truck, across a wide range of applications.”

Key updates include enhanced driver comfort and safety features, while improving ease of installation for body builders. The MD's cab is now four inches longer than the previous version, which gives drivers more seat recline and leg room. This refreshed cab further shows how the Mack Anthem® cab influenced the MD cab design and many of the shared driver-comfort features.

**Mack's commitment to improvement in the product is further proof that class 6 and class 7 customers can enjoy the iconic brand that class 8 customers have enjoyed for 125 years."**

**Michael Roquemore**  
Bruckner's Corporate Mack Sales Manager

"I am super excited for the MD cab refresh especially for our customers," says Michael Roquemore, Bruckner's Corporate Mack Sales Manager. "This gives the driver more space for reclining the seat and a little leg room. They now get a class 8 truck seat option and more room for those 3 man crews that work hard in the elements all day and want to relax with a little more space when they are headed out or back from the job. Since the launch of the MD product a few years ago, Mack has committed to improvements in driver safety and comfort. They have also committed to helping body builders, upfitters and mechanics work more efficiently with the added PTO overlay and switch options and body builder harnesses.

The medium duty truck has been a great product for the Bruckner's organization. We have enjoyed getting to know the medium duty market and customer needs. We will continue to grow our market share with this product and Mack's commitment to improvement in the product is further proof that class 6 and class 7 customers can enjoy the iconic brand that class 8 customers have enjoyed for 125 years."

Customers interested in the refreshed Mack MD Series models can contact their local Bruckner's Sales & Equipment dealer and sales representative or visit <https://www.brucknertruck.com> for more information.

**MACK TRUCKS**

**No. 1** **IN CUSTOMER SATISFACTION\***

\*Based on a 2023 survey of North American heavy duty (Class 8) truck owners.

## **INNOVATION, RELIABILITY, AND UNMATCHED PERFORMANCE FOR YOUR JOURNEY – OUR COMMITMENT SETS THE GOLD STANDARD.**

Dedicated to durability, reliability and meeting the needs of customers, Mack Trucks has provided purpose-built transportation solutions for more than a century.

Today, Mack is one of North America's largest producers of heavy-duty trucks, and Mack® trucks are sold and serviced through an extensive distribution network in more than 45 countries. Mack trucks, diesel engines and transmissions sold in North America are assembled in the United States. Mack manufacturing locations are certified to the internationally recognized ISO 9001 standard for quality, ISO 14001 standard for environmental management systems and ISO 45001 standard for health and safety management systems. Mack is also a proud sponsor of Share the Road, an American Trucking Associations public information campaign aimed at enhancing the safety of our nation's roadways.

Mack Trucks is part of the Volvo Group, which is driving prosperity through transport and infrastructure solutions, offering trucks, buses, construction equipment, power solutions for marine and industrial applications, financing and services that increase customer uptime and productivity. Founded in 1927, the Volvo Group is committed to shaping the future landscape of sustainable transport and infrastructure solutions. The Volvo Group is headquartered in Gothenburg, Sweden, employs about 104,000 people and serves customers in almost 190 markets. In 2023, net sales amounted to about \$52 billion. # EZ SERIES CLUTCHES

## 15.5" CLUTCH ASSEMBLY FEATURES

Road Choice offers medium and heavy-duty self-adjust and manual-adjust clutches to meet your customer's needs. Every Road Choice clutch utilizes cryogenically treated disc springs for longer life, crimped sleeve bushings that help with misalignment issues, and a sealed release bearing to prevent contamination.

**Road Choice EZ Series Clutch requires 25% less pedal effort.**

**Friction material is asbestos-free woven organic and sintered copper materials.**

**Fiber spacer free of charge in every new Road Choice clutch unit.**

**No cores to handle; new parts and assemblies are used.**

**24-Month and unlimited mileage warranty.**

**Made in the USA.**

# WHEEL END AND STEERING

## MAKING THE ROADWAYS SAFER

Safety is our guiding belief, our true north. It's what drives us to engineer products that are safer and inherently better because they last longer, perform exceptionally and save you money. That's what you get when you put safety first.

### Auto-Torq<sup>®</sup> Axle Fastener

STEMCO is changing the game on wheel ends again. With the Auto-Torq axle fastener, installation has never been easier. Auto-Torq sets the wheel end in optimum bearing adjustment for maximum life.

### Discover<sup>®</sup> XR

True innovation for the wheel seal market. Equipped with patented GlideLock technology.

### QwikKit<sup>®</sup> King Pin Kits

Keeping fleets on the road longer. Trust the King Pin Experts! Designed for durability and tested for toughness.

### QwikTie<sup>®</sup>

Highly adaptable for maximum efficiency. Patented design increases simplicity and safety. STEMCO QWIKTIE offers a highly adaptable solution that can accommodate over 80% of straight tie rod lengths with just two part numbers.
