BULKLEY TRUCKING

CARRYING THE SAME INTEGRITY THE COUNTRY WAS BUILT ON

A PARTNERSHIP BUILT ON TRUST

Bulkley Trucking has grown from humble beginnings into one of the top refrigerated carriers in the U.S., operating a fleet of 65 Volvo Trucks. The company's close relationship with Bruckner's Truck & Equipment has played a vital role in this success. Since purchasing their first 10 Volvo trucks in 2011, Bulkley Trucking has continued to invest in Volvo's premium features and performance. The company's mission to prioritize safety, comfort, and reliability for its drivers aligns perfectly with Volvo's design philosophy.

CLINT BULKLEY: FROM HARDSHIP TO SUCCESS

At just 19 years old, Clint Bulkley bought his first truck and taught himself to drive with the help of friends. Despite the challenges of starting a trucking business with no formal training, Clint's determination to provide for his young family kept him moving forward.

Over the years, his hard work began to pay off, and Bulkley Trucking was incorporated in 1987. What started as a one-truck operation has grown into a fully refrigerated carrier, servicing all 48 continental states. Today, Bulkley Trucking is ranked in the top 4% of U.S. trucking companies with some of the best safety scores in the industry. "God began to bless our hard work," Clint says, reflecting on the company's growth. "We outgrew our kitchen-table operations, rented office space, and things started multiplying."

DRIVER-CENTRIC PHILOSOPHY

Bulkley Trucking's approach to business has always been driver-focused. Clint himself drove over two million miles before becoming the company's first full-time dispatcher. His perspective as a driver has shaped the way the company treats its employees today.

"Our drivers are like family," Clint emphasizes. "We want them to be happy and comfortable, which is why we chose Volvo as our truck of choice. The drivers had a say in it. They wanted something roomy and comfortable, and Volvo delivered that."

This driver-first mindset is evident in Bulkley Trucking's retention rate, which sits well above the industry average at 50%. The company's dedication to work-life balance, safety, and comfort keeps drivers satisfied. Their fleet of Volvo VNL860 trucks is equipped with upgraded seats, spacious interiors, and advanced safety features.

A LEGACY OF INTEGRITY

Integrity has always been at the heart of Bulkley Trucking's operations. Clint and his wife Linda, who co-founded the company, have built a culture of loyalty, hard work, and respect. Employees are treated like family, and the company fosters a supportive environment where everyone helps each other out, whether it's on the road or in the office.

Bulkley Trucking's fleet of Volvo VNL860 trucks is equipped with upgraded seats, spacious interiors, and advanced safety features. They recently placed an order for 21 All New Volvo Trucks, underscoring their confidence in the brand.

Gary Stuart, one of the company's first employees, retired in 2021 after 25 years of service. LaWana Hohenberger, who joined as the weekend admin in 1995, is now the company's Controller and has been with the company for nearly three decades. This long-term commitment is a testament to the family-like atmosphere Clint and Linda have cultivated.

THE VOLVO CONNECTION: COMFORT, SAFETY, AND FUEL EFFICIENCY

When Bulkley Trucking began transitioning to an all-Volvo fleet in 2011, it wasn't just about operational benefits—it was about driver comfort. After testing various truck models, drivers overwhelmingly preferred Volvo, citing comfort and roominess as key factors. For Clint and his team, this decision was validated by Volvo's fuel efficiency and safety features, making it a win-win for both the drivers and the company's bottom line.

Today, Bulkley Trucking's fleet consists of 65 Volvo VNL860 trucks, all optimized for long-haul refrigerated

transport. "The fuel mileage is a bonus," Clint notes, with pride in his fleet's fuel economy, averaging 8.14 mpg year-to-date.

Volvo's commitment to innovation and safety also aligns with Bulkley's values. Clint emphasizes the importance of getting his drivers home safely, and Volvo's advanced safety features provide peace of mind. The company recently placed an order for 21 All New Volvo Trucks, underscoring their confidence in the brand.

A PARTNERSHIP ROOTED IN TRUST: BRUCKNER'S AND BULKLEY TRUCKING

Over the years, Bruckner's Truck & Equipment has been a vital partner in Bulkley Trucking's growth. From the initial purchase of 10 trucks in 2011 to the latest fleet upgrades, Bruckner's has provided consistent support.

Brent Williams, General Manager at Bulkley Trucking, praises Bruckner's: "We've enjoyed a long-standing relationship with them. They not only provide excellent

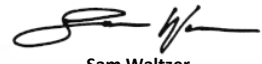

2024 HIGH PERFORMER

For achieving a high performance ranking as a SmartWay Refrigerated Truck Carrier in the "Carbon" recognition category.

Sam Waltzer
Director, SmartWay Transport Partnership

equipment but also help us out on the road by resolving mechanical issues or delivering parts promptly.”

For Clint, the relationship with Bruckner’s goes beyond business. He relates to the company’s legacy and values, especially after learning about founder Bennie Bruckner Sr. “I saw the story of Bennie sleeping on a mattress in his shop, and it choked me up,” Clint shares. “That’s the kind of hard work and integrity I respect. It’s what this country was built on, and it’s what I want in a business partner.”

LOOKING AHEAD: GROWTH AND INNOVATION

Bulkley Trucking’s future is bright. The company aims to continue reducing costs, increasing miles for drivers, and improving on-time performance for customers. With plans to expand their unique driver training program, Bulkley is positioning itself for continued growth.

This program, which pays drivers to learn rather than charging them, is part of the company’s commitment to creating a supportive, family-oriented environment. Clint and his team are excited about the future, confident in their continued partnership with Volvo and Bruckner’s as they look to scale their operations.

A LEGACY OF HARD WORK AND INTEGRITY

Bulkley Trucking’s success story is one of perseverance, hard work, and integrity. From Clint Bulkley’s early days as a 19-year-old learning to drive a truck to building a top-tier refrigerated carrier, the company’s growth has been organic and driven by a commitment to doing the right thing.

With Volvo Trucks providing the comfort and safety that drivers crave, and Bruckner’s Truck & Equipment offering unwavering support, Bulkley Trucking is well-positioned for continued success in the years to come.

WEBB ULTRA SET

Webb UltraSet Pre-Adjusted Hub Assembly

Installation Instructions

Follow the installation procedure to experience the faster and more secure Webb UltraSet pre-adjusted hub assembly. With Webb UltraSet there is no need to purchase, install and adjust separate wheel-end components and fasteners.

Tools Required for Installation

- Calibrated torque wrench capable of 250 ft/lbs
- Sockets for all applications
- Towel and/or emery cloth to clean spindle
- Cleaning solvent or brake cleaner

Step 1

Clean the spindle and remove all burrs. Also ensure that the wheel seal journal is clean.

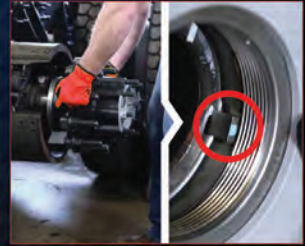

Step 2

Apply a light coating of lubricant to the spindle surfaces.

NOTE: The Webb UltraSet seal includes patented technology, eliminating the requirement for seal ID pre-lubrication.

Step 3

Align the assembly with the keyway and slide the Webb UltraSet hub onto the spindle, taking precaution NOT to bump or damage the wheel seal.

Step 4

Rotate the Webb UltraSet hub clockwise to engage the axle fastener and continue rotating manually until it stops.

Step 5

Unscrew and remove the Plastic axle fastener retainer and discard.

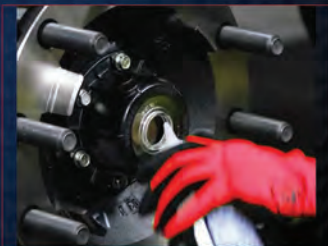

Step 6

Use a torque wrench to tighten the nut to **200-250 ft/lbs**. Rotate the hub one full rotation. Repeat this procedure two more times. Torque spec is the same for steer, drive and trailer applications.

Step 7

Install the hub cap per the manufacturer's recommendation.

Step 8

Add lubricant to the hub per the manufacturer's recommendation.

SUMP OIL CAPACITIES BY APPLICATION

FF 5.44	FF 5.06	FL	R	P	N
15.5 oz	15 oz	20 oz	32 oz	34 oz	19.7 oz

NOTE: The volumes listed above are suggested amounts to fill the hub cavity to hub cap "full" line (where applicable). The actual volume used should be verified and adjusted for components used.

Step 9

If removed, re-torque the hub's fill plug to 25-30 ft-lbs. Torque the hubcap fill plug to the manufacturer's recommendation. If needed, re-install the hub cap plug.

REASONS YOU SHOULD CONSIDER UTILIZING BRUCKNER'S FINANCE DEPARTMENT

- ✓ Convenient "application only" credit process (for transactions up to \$1,500,000)
- ✓ Quick credit decisions, often times same day
- ✓ Minimal down payment including \$0 down and/or 72 month amortization loans available
- ✓ Token payment options available for seasonal operation
- ✓ FMV and TRAC Leases available
- ✓ Lines of credit for future equipment purchases available — keeping bank lines open for working capital needs
- ✓ Refinance options to assist with cash flow during economic down-turns
- ✓ Competitive rates, flexible terms
- ✓ Convenient "One Stop Shopping" with experienced, industry professionals
